FORCE HEALTH PROTECTION NATO CONFERENCE

23-26 JUNE 2014
BUDAPEST HUNGARY
SEMMELWEIS UNIVERSITY

**For more information and
registration please visit**
www.nato-health-conference.com

The NATO Centre of Excellence for Military Medicine (MILMED COE) in cooperation with the Medical Corps International Forum (MCIF) are organizing the Force Health Protection NATO Conference 2014 on 23-26 June 2014 in Budapest, Hungary.

Further contributing partners are: the Hungarian Defence Forces and the Hungarian Defence Forces Medical Centre, the NATO COMEDS Force Health Protection Working Group (FHP WG), the Semmelweis University, and the University of Pécs Medical School.

The conference will be organized primarily for the benefit of the worldwide military Force Health Protection communities, and their closely associated expert groups with sessions on a variety of topics from the scope of Force Health Protection, including medical evacuation, trauma cases and trauma prevention, non-traumatic diseases and post-traumatic stress disorder. Nevertheless it is anticipated that it will be of interest to both military and civilian scientists and decision makers of a wider public health network.

This conference will provide a unique and excellent occasion for experts of both the military and civilian sector to meet and to discuss current Force Health Protection related issues.

It would be our pleasure to welcome you in Budapest attending our conference on 23 – 26 June 2014.
