

VectorBuilder

Introducing **VectorBuilder**, the world's leader in custom vector design services and a one-stop-shop for all your cloning needs. With our intuitive, user-friendly software, you can custom design your particular vector of interest and save time and money versus DIY cloning.

What does VectorBuilder offer?

- **Free-to-use online tool – VectorBuilder.com**
- **80+ different backbones** (CRISPR, lentiviral, adenoviral, AAV vectors, inducible, enhancer testing, bacterial protein expression, plant, PiggyBac, Tol2, etc.)
- **Send us your vectors as templates** – outsource subcloning, mutagenesis, any modification
- **Extensive library of ORFs, tag, linkers, selection markers**
- **100% sequence guarantee**
- **Highly regarded downstream virus packaging, BAC modification, shRNA/gRNA library construction**
- **Prices starting at \$99**, fast turnaround (1-2 weeks), all with the flexibility necessary for custom vector design
- **>160,000+ vectors** delivered worldwide

VectorBuilder can greatly streamline your research efforts. You can easily generate a quote or PO on our website or also open a standing PO to save time. All vectors generated are designed ***specifically for you***: you retain all intellectual property of the vectors we send you, making downstream licensing much easier.

Try **VectorBuilder** now! Use the promo-code **VISPECIAL** and receive a **25% discount on your first-time purchase**.
